

# CAMPUS SAFETY

## Sexual Assault

Many victims of sexual assault are under the influence when an incident occurs. Make smart choices so that your judgment and your safety aren't compromised by alcohol or drug abuse.

## Getting Help

If you're under the influence and an emergency occurs, your response time is going to be slowed. If a friend gets injured, will you be able to get help? If you hurt yourself, will you know what to do?

## Prescription Drugs

"Pharming" or abusing your "legal" prescriptions or giving/selling them to others can lead to unintentional overdoses and bodily harm. They can be especially dangerous if mixed with alcohol!

## Fire Facts

Up to 40% of residential fire deaths victims are alcohol impaired at the time.

Staying Safe is about making smart choices...
