

CAMPUS SAFETY

Tip Of The Week

Here are some ways to protect your beloved bike and its equally beloved owner:

Record the serial number of your bike.

Never leave your bike unattended or unlocked.

Use sturdy U-Locks or heavy, case-hardened chains to lock your bike

Lock your bike on a bike rack.

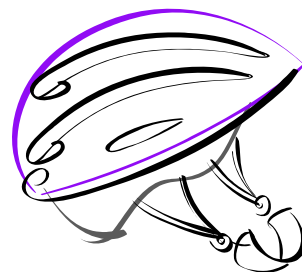

Most stolen bikes were never even locked up!

If you're really concerned about theft, carry your front wheel with you after you park your bike. Who'd steal a one-wheeled bike?

While you're at it, take your accessories. Those gel pad seats are a hot commodity!

Wear a helmet.

Stay off the sidewalks. Use bike lanes instead.

Be sure your bike has a front light and reflectors to meet the state law.
